

Public Maven Repository Integration Note

Workspace ONE for Android

The Omnissa Workspace ONE® software development kit for Android can be utilized directly from a public Maven repository.

Downloads

Omnissa provides this Software Development Kit (the “Software”) to you subject to the following terms and conditions. By downloading, installing, or using the Software, you agree to be bound by the terms of [SDK License Agreement](#). If you disagree with any of the terms, then do not use the Software.

For additional information, please visit the [Omnissa Legal Center](#).

License

This software is licensed under the [Omnissa Software Development Kit \(SDK\) License Agreement](#); you may not use this software except in compliance with the License.

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an “AS IS” BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

That applies however you obtain or integrate the software.

Tasks and Documentation

Integration of an Android application with the Workspace ONE platform includes a number of tasks for the application developer. Instructions for these tasks are given in a set of documents: the Workspace ONE Integration Guide for Android.

The integration guide documents are available in the [Workspace ONE Android SDK Overview](#).

Open Source Sample Code

Open Source sample code for integration of Android applications with Workspace ONE is published to a GitHub repository. The build files in the repository have been updated to utilize the public Maven repository.

The sample code repository is here:

github.com/euc-releases/workspace-ONE-SDK-integration-samples

Each app directory has the following build files.

- **publicMavenClient.gradle** to integrate at the Client level.
- **publicMavenFramework.gradle** to add integration at the Framework level.
